

ENVIRONMENTAL POLICY

BMT Medical Technology s.r.o.

Our organisation stands out for reaching the position of a reliable and sought-after company responsibly dealing with the environment and being aware of the necessity of keeping the sustainable growth of the society allowing current and future generations to satisfy their basic life needs without reducing the variability of nature and preserving natural functions of eco systems.

Our long-term and permanent aim is to provide high-quality service in the field, fully satisfying the wide range of our clients, with stress put on quality of performed works, with simultaneous fulfilment of all and any legal and other requirements towards work safety and environmental protection.

Being aware of the above stated, the management of our company declares the following policy in the field environmental management:

- Our basic obligation is to fulfil the legal and other requirements in the field of arranging quality and safety of work as well as environmental protection as applicable to our company.
- We consider preventive care and permanent improvements in the field of environmental protection to be a priority.
- Based on education of employees and communication with clients we will influence their awareness and responsible behaviour towards the environment.
- In all and any existing and planned activities, we will apply permanent efforts to reduce environment pollution, mainly in the field of waste treatment. We want to avoid environment pollution or damage and minimize negative impacts of our activities to the environment.
- We avoid emergency situations by readiness and prevention. If they do occur, we apply emergency procedures and rules arranging minimization of negative impacts to the environment.
- We appropriately apply the specified policy of environmental protection and we require the same from our contractual partners.

This Environmental Management System Policy is binding for all the employees and persons working based on authorisation and/or in favour of our organisation.
